

GEM/2026/B/8006113

Providing, Supplying and Installation of CCTV Cameras and other ancillary work — Office Building, Civic Centre and Library Room

Khambhaliya Nagarpalika, Directorate of Municipalities, Urban Development and Urban Housing Department, Gujarat
84 cameras, 3 video recorders, 6 storage drives — 93 items in all

01. TENDER OVERVIEW

Bid / Tender Number	GEM/2026/B/8006113 (the file you sent is bid document id 9858007)
Bid Document Dated	08-09-2026
Ministry / State	Gujarat
Department	Urban Development and Urban Housing Department, Gujarat
Organisation / Office	Directorate of Municipalities — Khambhaliya Nagarpalika
Grievance contacts	HOD: co-np-kha@gujarat.gov.in Buyer: con14.dm.gj@gembuyer.in
Item Category	Camera for CCTV System (V3) · Video Recorder for CCTV System (V2) · Internal Storage Device (SSD/HDD) (V2)
Primary product category	Camera for CCTV System (V3) — the eligibility tests are judged against this line
Total quantity	93 items: 70 indoor bullet IP cameras + 14 outdoor bullet IP cameras + 3 video recorders + 6 storage drives
Bid End Date / Time	18-09-2026 11:00 — already closed
Bid Opening Date / Time	19-09-2026 11:00 — also past
Offer Validity	90 days from bid end date
Type of Bid	Two Packet Bid — technical and financial opened separately
Reverse Auction	No
Evaluation Method	Total value wise evaluation. Financial document required.
Estimated Bid Value (ECV)	Not published. The buyer left the Estimated Bid Value field empty, so there is no official figure in this document and none can be quoted. See section 03 for what can and cannot be inferred.
EMD	Rs. 45,000. Advisory bank: Bank of India. Also acceptable as a surety bond, or as an FDR pledged to “CHIEF OFFICER, KHAMBHALIYA NAGARPALIKA” — the FDR hard copy must reach the buyer within 5 days of bid end. Beneficiary: Chief Officer, Khambhaliya Nagarpalika.
ePBG / Performance Security	Not required — the ePBG section says Required: No.
Payment	Within 45 days of the Consignee Receipt-cum-Acceptance Certificate (CRAC) and online bill submission. This supersedes the 10 days in GeM GTC clause 12.
Delivery	15 days for every line item, to Karmur Sanjaykumar Khimabhai, Near Nagargate, Nagarpalika Garden, Khambhaliya 361305.
Minimum turnover (bidder)	Rs. 7 Lakh average over the last 3 years
Minimum turnover (OEM)	Rs. 30 Lakh average over the last 3 years — the manufacturer's figure, not ours
Years of past experience	3 years of supplying the same or similar category to a Central or State Government body or PSU
Past Performance	30% of bid quantity (about 28 cameras) supplied to a Government body or PSU in at least one of the last three financial years
MSE relaxation	No — Khambhaliya Nagarpalika switched it off
Startup relaxation	No — switched off as well
MSE Purchase Preference	No
MII Purchase Preference	No
Documents demanded from seller	Experience Criteria · Past Performance · Bidder Turnover · Certificate (Requested in ATC) · OEM Authorization Certificate · OEM Annual Turnover · Additional Doc 1 (Requested in ATC)
BIS registration	Compulsory. The CCTV category falls under BIS Scheme-II (Compulsory Registration). Goods must conform to IS 13252 (Part-1) and carry the Standard Mark under a BIS licence. The consignee is required to verify it on delivery.
Inspection	Not required by an empanelled inspection authority
Auto-Extension	Minimum 1 bid to disable; 3 days extension; 1 count
Option Clause	25% — the buyer may move the quantity by a quarter at contract placement, and may increase it again by up to 25% during the contract at the same rates. Bidders are bound to accept.

Bid splitting	Not applied
Arbitration / Mediation	Arbitration: No. Mediation: No.
Buyer-uploaded ATC	Yes, one exists — the bid document links to it, but that file was not part of the PDF you sent. Its contents are unknown, and it is named as the source for two of the seven demanded documents.

02. SCOPE OF WORK

Supply and install 84 CCTV cameras, 3 video recorders and 6 storage drives at Khambhaliya Nagarpalika's office building, civic centre and library room, with all ancillary work.

This is a goods bid with installation attached, not a works contract. Everything goes to one address — Near Nagargate, Nagarpalika Garden, Khambhaliya 361305 — and every line carries the same **15-day delivery**. There is no contract period, no maintenance term and no site list beyond the three buildings named.

The ancillary installation work is not specified in this document. It appears only as an additional specification parameter reading "Refer ATC — Providing, Supplying, and Installation C.C. Camera and other ancillary work in Office Building, Civic Center and Library Room". **The ATC that defines it is not in the file you sent**, so cabling runs, conduit, poles, power points, racks and labour are all unknown. On a 93-item job spread over three buildings, that unknown is most of the cost.

Line item	Quantity	What the tender specifies
Camera for CCTV System (V3) — indoor	70 pieces	Bullet type, IP camera, 2MP (1920 x 1080) or better, 25/30 or 50/60 fps or higher, triple stream (full and compressed), IR illumination 15 m and upward, indoor installation. Comprehensive warranty 2, 3, 4 or 5 years or higher. BIS required.
Camera for CCTV System (V3) — outdoor	14 pieces	Same core specification, outdoor housing. Not a PTZ or speed dome — the tender rules that out explicitly. Comprehensive warranty 2 to 5 years or higher. BIS required.
Video Recorder for CCTV System (V2)	3 pieces	Warranty 2 or 3 years or higher. The tender gives no channel count in this document.
Internal Storage Device (SSD/HDD) (V2)	6 pieces	Sequential write 4,000 Mb/s upward, spindle speed 7200 / 10000 / 15000 RPM or higher for HDD, on-site warranty 1, 3 or 5 years or higher.

What the document does not say. No estimated value, no channel count for the recorders, no storage capacity requirement, no cabling schedule, no pole or mounting detail, no power arrangement, and no drawing or site plan. Four of those sit in the buyer's ATC, which is not in this file.

03. BID STRATEGY & RECOMMENDATION

a. What the ECV actually buys

Derivation	Figure
Estimated Bid Value published by the buyer	None. The field is empty in the bid document.
EMD demanded	Rs. 45,000
What that <i>might</i> imply	If Khambhaliya had used the usual 2% rule, an EMD of Rs. 45,000 would sit against roughly Rs. 22.5 Lakh. This is arithmetic on our side, not a figure the buyer published — GeM buyers set EMD at a flat amount as often as at a percentage, so do not plan on it.
Total items to supply and install	93 — 84 cameras, 3 recorders, 6 drives
Performance security	None. ePBG is not required on this bid.
Delivery window	15 days from order, every line

b. Price scenarios — arithmetic discounts on the ECV, not a costing.

Scenario	Quote	Ex-GST per item
Cannot be computed	—	—
Why	The buyer published no Estimated Bid Value , so there is no base to discount from. The five standard scenarios (0%, 3%, 5%, 8%, 11% below ECV) have nothing to attach to.	—
What to price instead	Build the number bottom-up: 84 BIS-marked IP cameras at the offered specification, 3 recorders, 6 drives, plus the ancillary installation the ATC defines — cabling, conduit, mounting, power and labour across three buildings.	—

Scenario	Quote	Ex-GST per item
The item that decides the price	The ancillary installation scope in the ATC . On a 93-item job the hardware is quotable from any OEM price list; the cabling and labour are not, and they are the part we cannot see.	—
Warranty to cost in	Comprehensive warranty is an allowed value from 2 years upward on the cameras and 1 year upward on the drives. Quoting a longer warranty scores nothing here — evaluation is total value wise — so quote the minimum the tender accepts.	—

c. The honest read on price. There is no honest price read on this bid, because the buyer did not publish an estimated value and the installation scope sits in an ATC that is not in this file. What can be said is that the commercial shape is unusually thin for us: **there is no reverse auction**, so the written number is final; **there is no performance security**, so nothing is locked up after award; and **there is no MSE or MII purchase preference**, so a low number is the only lever. Against that, the bid demands an OEM authorisation and the OEM's own turnover, which means whatever margin exists is shared with the manufacturer who signs for us.

d. Recommendation. This bid closed on 18-09-2026 at 11:00 and opened the next morning. Nothing can be submitted now, so treat this summary as a record and as a template for the next Gujarat municipal CCTV tender, which will read almost identically. Two things are worth taking from it. **First, the shape of the block:** MSE relaxation off, startup relaxation off, MSE purchase preference off, MII preference off, OEM authorisation and OEM turnover both demanded. Every advantage we normally carry was switched off by this buyer, and that is a deliberate pattern in Nagarpalika CCTV bids, not an accident. **Second, the OEM question is the real gate** — not our turnover, which clears the Rs. 7 Lakh bar many times over. Without a BIS-registered camera manufacturer willing to issue us an authorisation certificate and hand over their audited turnover, we cannot bid this category at all. That relationship is worth building now, before the next one opens, because it cannot be arranged inside a ten-day bid window.

04. RISK ASSESSMENT

Category	Level	Assessment
Timing	CRITICAL	The bid closed 18-09-2026 at 11:00 and opened 19-09-2026. Today is 30-09-2026. Nothing can be submitted, and the auto-extension (1 bid, 3 days, 1 count) would have lapsed long ago.
Eligibility — OEM dependence	HIGH	The bid demands an OEM Authorization Certificate and the OEM's audited turnover of Rs. 30 Lakh . We are not a camera manufacturer. Without a BIS-registered OEM signing for us, this bid is closed to us regardless of anything else we hold.
Eligibility — past performance	HIGH	30% of bid quantity, about 28 cameras , supplied to a Central or State Government body or PSU in one of the last three financial years, evidenced by contracts. Our experience file is a scanned image — a person must open it and check whether any single year carries a CCTV supply of that size to a government buyer.
Eligibility — relaxations refused	HIGH	MSE relaxation No , startup relaxation No . Our Udyam and DPIIT certificates buy us nothing on the experience or turnover bars here. This is the buyer's decision, not a gap in our papers.
EMD with no exemption	MEDIUM	Rs. 45,000 in cash or FDR . The GeM note grants MSE EMD exemption to manufacturers of goods only, and we are a service provider, not a camera manufacturer — so the exemption does not reach us on this bid. The FDR route also needs a hard copy delivered within 5 days of bid end.
Unseen ATC	HIGH	A buyer-uploaded ATC exists and is named as the source for the "Certificate" and "Additional Doc 1" slots, and for the whole ancillary installation scope. It is not in the file supplied , so both the document list and the cost base are incomplete.
BIS compulsory registration	MEDIUM	Cameras must conform to IS 13252 (Part-1) and carry the BIS Standard Mark under Scheme-II. The consignee verifies it on delivery and non-compliance draws action under the GeM IM policy. This narrows the OEM field considerably.
Delivery	MEDIUM	15 days for all 93 items including installation across three buildings. Camera stock at the required BIS registration is the constraint, not the labour.
Commercial	MEDIUM	No reverse auction, no purchase preference, no performance security, and total-value-wise evaluation — a pure lowest-price contest with no second chance and no advantage from our MSE status.
Contractual	LOW	No arbitration and no mediation clause. Option clause of 25% either way at contract placement, and a further 25% increase during the contract at the same rates, which we are bound to accept.

05. FINANCIAL ELIGIBILITY & TECHNICAL ELIGIBILITY

How to read the colours: **GREEN** we fully match this, the paper is ready. **YELLOW** partial match — we probably qualify but something has to be checked or added first. **RED** no match — we do not meet this as we stand.

a. FINANCIAL ELIGIBILITY

What the buyer asks	How much / what exactly	What we have	Status
Average yearly turnover of last 3 years	At least Rs. 7 Lakh average, verified by the buyer at technical evaluation	Our 3-year average is Rs. 16.20 Crore per the CA certificate of N J Salot & Associates dated 16.06.2026. Clears the bar many times over. Map ARKONIK TURNOVER DONE.pdf .	MATCH

What the buyer asks	How much / what exactly	What we have	Status
OEM average turnover of last 3 years	At least Rs. 30 Lakh — the camera manufacturer's figure, with their audited balance sheets or CA certificate	Not ours to give. This is the OEM's document and only they can supply it. Without an OEM behind us there is nothing to upload here.	NO MATCH
EMD	Rs. 45,000 online, or surety bond, or FDR pledged to the Chief Officer with the hard copy delivered within 5 days	Payable. The MSE exemption reaches manufacturers of goods, and we are not the manufacturer, so we would have to pay it in full.	PARTIAL
Legal status	Company registered in India	Private Limited Company, CIN U74996GJ2023PTC140363. Certificate of Incorporation, MOA and AOA all on file.	MATCH
MSE / Startup relaxation	Both refused by this buyer	We hold Udyam-GJ-01-0352752 (Micro, Services) and DPIIT DIPP251312, both valid and current. Khambhaliya Nagarpalika switched both relaxations off , so neither certificate lowers a bar on this bid. That is the buyer's decision, not a gap in our papers.	PARTIAL
Performance security	None required	Nothing to arrange. No bank guarantee, no deposit. No bid risk.	MATCH

b. TECHNICAL ELIGIBILITY

What the buyer asks	How much / what exactly	What we have	Status
OEM Authorization Certificate	A certificate from the camera manufacturer authorising us to quote their product on this bid	We hold no OEM authorisation for CCTV. Only a manufacturer can issue it and it must name this bid. This is the single item that decides whether we can bid this category at all.	NO MATCH
Years of past experience	3 years of regularly supplying the same or similar category to a Central or State Government body or PSU, with contracts and CRAC copies for each financial year	The company was incorporated in 2023, so it is about three years old, and our line is OFC and telecom rather than CCTV supply. Open the experience file by eye and check whether CCTV or similar goods were supplied to a government buyer in each of the three years. Expect this to be tight.	NO MATCH
Past Performance	30% of bid quantity — about 28 cameras — supplied to a Government body or PSU in at least one of the last three financial years, evidenced by contracts	Same scanned experience file, same manual check. Look for a single year carrying a CCTV supply of 28 units or more to a government buyer.	NO MATCH
BIS registration of the goods	Cameras must conform to IS 13252 (Part-1) and carry the BIS Standard Mark under Scheme-II of the Compulsory Registration Scheme	This is the OEM's registration, not ours, but we carry the consequence — the consignee verifies the mark on delivery. Any OEM we approach must already hold it.	PARTIAL
Camera specification	Bullet IP cameras, 2MP or better, 25/30 or 50/60 fps or higher, triple stream, IR from 15 m upward, indoor and outdoor variants, comprehensive warranty from 2 years	Standard commercial specification that any established CCTV OEM meets. Nothing here is unusual or restrictive.	MATCH
Installation capability	Supply, installation and ancillary work across the office building, civic centre and library room	Installation and cabling is work we do every day. This part is comfortably within us — it is the supply side of the bid that blocks it.	MATCH
Delivery in 15 days	All 93 items delivered and installed within 15 days of order	Achievable on the labour side. Depends entirely on the OEM holding BIS-marked stock.	PARTIAL

Nothing in this bid contradicts itself — and that is worth saying plainly, because it removes the usual argument. On many tenders the GeM page grants MSE and startup relaxation while the buyer's ATC tries to withdraw it, and that contradiction is worth raising in the Representation window. Here there is no contradiction to raise: the GeM bid page itself records MSE relaxation as No, startup relaxation as No, MSE purchase preference as No and MII purchase preference as No. Those are the buyer's own switches, recorded on the page, and a representation against them would go nowhere. **The one thing that would have been worth a representation is the OEM Authorization Certificate slot** — GeM's own disclaimer voids ATC clauses that mandate procurement from a specific brand, make or dealer, and demanding OEM authorisation on a bid with an installation scope sits close to that line. That window closed with the bid.

06. MANDATORY SUBMISSION CHECKLIST & DOCUMENT MAPPING

Seven documents are demanded from the seller on the GeM page, and the buyer's uploaded ATC — which is not in the file you sent — names two more. **MAP** means the exact file already exists, upload it as it is. **CREATE** means we write it ourselves on our letterhead. **MANUAL REQUIREMENT** means only an outside office can issue it. The **Review** column says what to look at before uploading.

#	Document as named in the tender	Action & file	Review
1	"Experience Criteria" — GeM page, documents required from seller	MAP: KYC DOCS/arkonik EXPERIENCE.pdf	Open the file and read it yourself first. It is a scanned copy with no text layer, so nothing in it can be read by machine. Look for supplies of CCTV or similar goods to a Central or State Government body or PSU in each of the last three financial years, with the contract and the CRAC or delivery acceptance certificate attached to each. Our record is OFC and telecom work, so expect this to come up short.
2	"Past Performance" — 30% of bid quantity supplied in at least one of the last three financial years	MAP: KYC DOCS/arkonik EXPERIENCE.pdf , plus the matching contract copies	Same file, different test. About 28 cameras in one financial year to a government buyer. Check it at the same time as row 1. If the number is not there, this bid cannot be entered, relaxation or no relaxation.
3	"Bidder Turnover" — minimum Rs. 7 Lakh average over 3 years	MAP: KYC DOCS/ARKONIK TURNOVER DONE.pdf , with the Annual Report 2023-24 and the FY2024-25 Audit Report behind it	Comfortably met — our 3-year average is Rs. 16.20 Crore. Just confirm the UDIN and the CA's PAN are printed on the certificate before upload. No bid risk on this row.
4	"OEM Authorization Certificate"	MANUAL REQUIREMENT — a certificate from the camera manufacturer authorising us to quote their product against this specific bid number	We hold none, and only the OEM can issue it. Typical turnaround is 3 to 7 working days once a relationship exists, and far longer from a cold start. The manufacturer must hold BIS registration under IS 13252 (Part-1). Without this the bid cannot be submitted at all — start the OEM conversation before the next Nagarpalika CCTV tender opens, not after.
5	"OEM Annual Turnover" — minimum Rs. 30 Lakh average over 3 years	MANUAL REQUIREMENT — the OEM's audited balance sheets or their CA / cost accountant certificate	Comes from the same OEM as row 4 and is asked for at the same time. Not our document and not something we can substitute. Most established camera manufacturers clear Rs. 30 Lakh easily, so this follows the authorisation rather than blocking separately.
6	"Certificate (Requested in ATC)"	Cannot be determined. The ATC that names this certificate was not in the file supplied.	Nothing can be mapped until the ATC is read. On GeM, a slot marked "Requested in ATC" is only mandatory if the ATC actually names a document — if it names nothing, it is not a mandatory document. Download the buyer's ATC from the bid page and check before treating this as a gap.
7	"Additional Doc 1 (Requested in ATC)"	Cannot be determined. Same reason as row 6.	Same rule. "Additional Doc 1" usually appears nowhere in the ATC, in which case it is not a mandatory document and the slot is used as a catch-all. Confirm against the ATC rather than assuming either way.
8	EMD — Rs. 45,000, GeM page and Buyer Added condition 2	CREATE — pay online on GeM, or arrange an FDR pledged in the name of "CHIEF OFFICER, KHAMBHALIYA NAGARPALIKA" with the bank's certification that it is withdrawable only on the pledgee's demand	No exemption reaches us here. The GeM note limits MSE EMD exemption to manufacturers of goods, and traders are excluded outright. If the FDR route is used, the scanned copy goes with the bid and the hard copy must reach the buyer within 5 days of bid end — that deadline is easy to miss.
9	BIS conformity — IS 13252 (Part-1), Scheme-II Compulsory Registration	MANUAL REQUIREMENT — the OEM's BIS licence and Standard Mark registration for the offered camera models	Not a listed upload slot, but the consignee verifies the Standard Mark on delivery and non-compliance draws action under the GeM IM policy. Ask the OEM for their BIS registration number at the same time as the authorisation — a camera without it cannot be delivered against this order.
10	Financial document / price bid — GeM page, Financial Document Required: Yes	CREATE — the price breakup in the format the bid requires, covering all four line items	Evaluation is total value wise, so the comparison is on the grand total. Price all 93 items plus the ancillary installation the ATC defines.
11	Certificate of Incorporation and constitution documents	MAP: KYC DOCS/Certificate of Incorporation.pdf + KYC DOCS/MOA_DNV & TDV(2).pdf + KYC DOCS/AOA_DNV & TDV(2).pdf	Held. Use the incorporation certificate itself (CIN U74996GJ2023PTC140363), not a paper that only quotes the number. MOA and AOA are scanned images — check they are legible at upload size.

#	Document as named in the tender	Action & file	Review
12	GST and PAN	MAP: KYC DOCS/ARKONIK GST.pdf + KYC DOCS/Arkonic PAN.pdf	Both held. The work is in Gujarat and our GSTIN is Gujarat, so there is no state mismatch on this one — unusually straightforward. Check the PAN scan is readable.
13	Udyam and DPIIT startup certificates	MAP: KYC DOCS/Arkonic MSME.pdf (Udyam-GJ-01-0352752) + KYC DOCS/ARKONIK STARTUP.pdf (DIPP251312)	Both valid. Worth submitting even though this buyer refused both relaxations — they cost nothing to attach and they establish our standing for any later clarification. Just do not rely on them to lower a bar here.
14	Board Resolution authorising the signatory — our standing rule, not named in the tender	MAP: BR.pdf	Goes into every bid whether the tender asks for it or not — it authorises the person signing, so every other signed paper rests on it.
